DAY 1 · READING

Apps overview

The tools you will use as a First Circle Account Manager, and what each one is for.

The big picture

Everything you use falls into a few groups.

Everyday

Gmail

Notion

Product

Connect

Connect Staging

Zendesk

CRM

HubSpot (current)

Acqui Service (next)

Work with other teams

Asana + Forms

Reports & people

Metabase

BambooHR

3CX

Internal tools

FCC / BVP

Sales Ops File Tool

FC Collaterals

Everyday

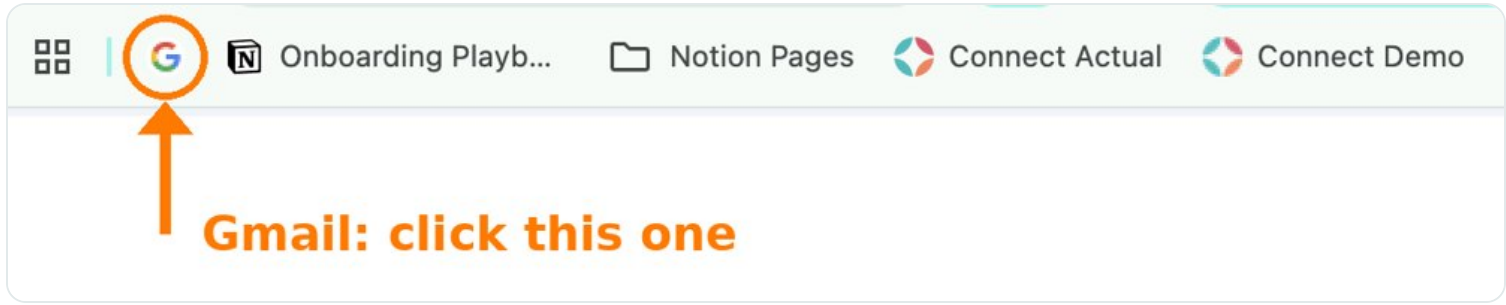

The two you will open first, every day.

Gmail

Your work email. Tool invites and updates land here.

Notion

Our encyclopedia and SOP directory. Policies, playbooks and guides live here.

Both are on your Chrome bookmarks bar.

Product

What our clients use, and where you practice.

Connect

Our main web app. Clients use it to access and do their banking.

Connect Staging

Practice here

Test version of Connect. Engineers and Product use it for demos. AMs use it for training and practice. Bookmark name: *Connect Demo*.

Zendesk

Support website for Connect and our other products. Raise bugs and issues here.

Practice and demos only in Connect Staging. Never in Connect (actual): that has real clients.

CRM

Where we track leads, deals and client activity.

H

HubSpot Being phased out

Our current CRM.

A

Acqui Service Coming

Our new CRM. We are migrating to this.

You will learn HubSpot first. Expect the move to Acqui Service during your time here.

Asana and Forms

How we get things done with other departments.

Asana

Tasks and requests that involve more than one team.

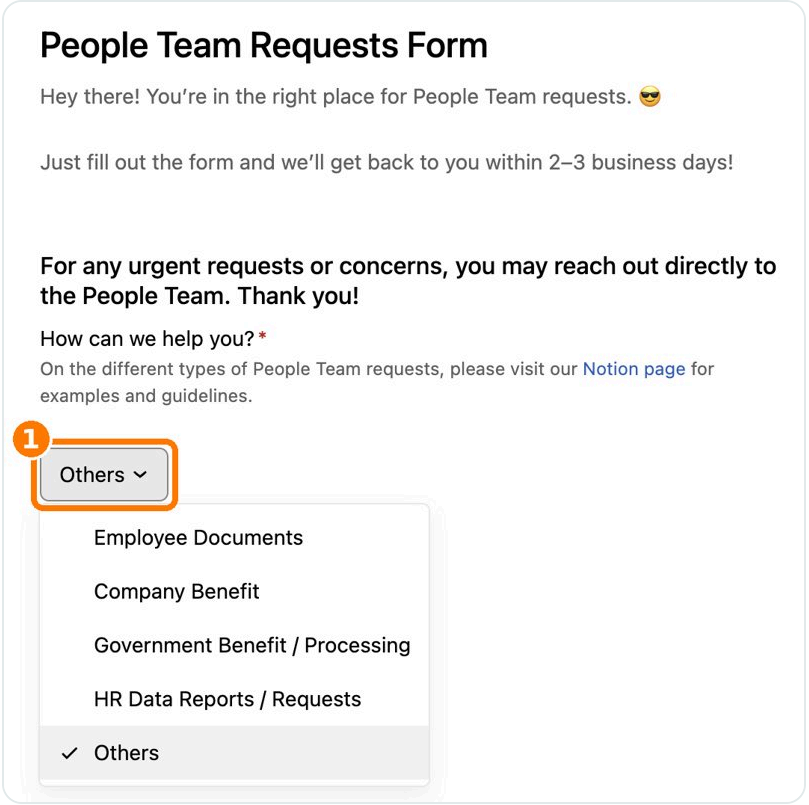

Forms

Company forms connect to Asana. Submit a form and an Asana task is created for you.

Example: reimburse your fitness allowance

1. Fill in the Employee Reimbursements form.
2. One Asana task goes to the **People Team** to approve your gym.
3. Another goes to **Finance** to process it in payroll.

One form, two departments.

Example: People Team Requests Form

Reports and people

Numbers, your own HR needs, and calls.

Metabase

Reporting and dashboards. Where you look at and show numbers.

BambooHR

Performance and manager assessments, and filing your leaves.

3CX

Our calling app, used for cold calls.

Internal tools

Built by and for our teams.

F

FCC / BVP

Main app of Risk Operations for assessing documents. You upload documents here once a client agrees to enroll.

S

Sales Ops File Tool

Tool to process files.

C

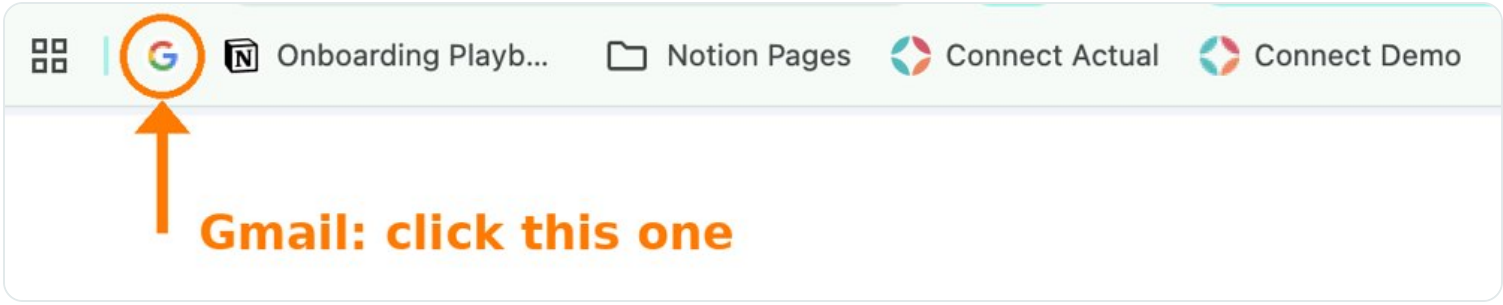

FC Collaterals

Customize your collaterals (for example your email signature).

Where to find them

Do not memorize links.

Almost everything is already on your **Chrome bookmarks bar.** Import the First Circle bookmarks file on Day 1 and you are set.

Not sure which tool to use? Ask your Team Lead, then Salesops.
